

## DNA CASE NOTES

A.1. The case notes will contain at least the following where applicable:

- A.1.1 Evidence description
- A.1.2 Evidence receipt date
- A.1.3 Extraction information
- A.1.4 Quantitation information
- A.1.5 Amplification information
- A.1.6 GeneMapper ID-X generated electropherograms
- A.1.7 Allele call table designating the analyst's interpretation of results
- A.1.8 Allelic ladders utilized in sizing or analysis summary sheet
- A.1.9 Print out of negative controls
- A.1.10 Print out of amplification positive controls
- A.1.11 Print out of all relevant GeneScan-500 LIZ or ILS 600 data
- A.1.12 Statistical results
- A.1.13 Match estimation documentation
- A.1.14 Technical review sheet
- A.1.15 CODIS eligibility documentation to include non-suspect elimination, why the location of the evidence is relevant to the case, and why the evidence is believed to be associated with a suspect

**Note:** When using GeneMapper ID-X to analyze data, it is acceptable to use a screen shot of the analysis summary window as documentation that the allelic ladders were acceptable.
